Plant Daffodils This Fall

FIFTEEN DAFFODILS FOR NATURALIZING, \$1.00

15 Bulbs, \$1.00; 100 Bulbs, \$5.95.

Daffodils are the first major flowers to bloom in the spring. By nature they are informal flowers, and look best when grown in drifts, in the shrubbery or under the trees. They like to nestle among the roots of shrubs, and as they bloom before the leaves develop, they thrive in places which later in the season are well shaded. Our naturalizing mixture is an exceptional value, containing many of the best named Trumpet, Leedsii, Star and Paeticus varieties. Plant the bulbs and do not disturb until they crowd; the bulbs may then be lifted and replanted over a much larger area. A purchase of bulbs is an investment which will pay in bloom for a lifetime.
